Manufacturing

WE BRING LODGING CONCEPTS TO LIFE.

Good design communicates.

While function governs what a piece becomes, design gives it life, and allows a collection of furniture to make a room.

Bigger Ideas

Through continual dedication, Lodging Concepts Manufacturing has become one of the nation's largest casegoods manufacturers. We start every project looking at the big picture. We understand the friction between designers and purchasing firms, and work to minimize the pain points in order to achieve a successful hotel opening.

Ultimately, what drives us is the desire to understand what makes people fall in love with a room, and how to craft rooms that communicate what words can't say.
